

BUSINESS REQUIREMENT:

To add the functionality for users to log in to our news website with their Facebook account. Users should be able to add comments only if they login using their Facebook account.

ASSUMPTIONS:

- The current requirement is only for web based applications.
- The user already has a Facebook account.
- The client/web application is registered on Facebook.
- There is a backend application to save the comments

Below diagram explains the login flow using Facebook at a high level.

Note:

- *Current flow covers only the happy scenario path.*
- *The current solution is designed only for response_type = code*
